

TiTaN was established in the year 1981 by an Eminent Scientist, Electro chemist turned entrepreneur Dr. R. Thangappan with a primary objective of serving the Electrolytic industry by offering the then developed State-of-art commercially comparable Metal Anodes.

The Dimensional stability of these Metal Anodes coupled with possibility of reticulated geometry enables ready gas disengagement from the active surface thus drastically reducing cell voltage and faradic efficiency losses caused by bubble effect unlike in a Graphite Electrode

Substrate Materials

- ▶ Nickel
- ▶ Titanium

Types Offered

Membrane Cell Anodes ◀

- Louver Anodes
- Mesh Type Anodes

Mercury Cell Anodes ◀

- Mesh Bed Anodes
- Strip Type Anodes
- Finger Type Anodes

Diaphragm Cell Anodes ◀

- Box Type Anodes

Process

- ▶ Thermal Decomposition

ATMA[®]
Electrodes & Anodes

ATMA™ LOUVER TYPE MEMBRANE CELL ANODE

ATMA™ TITANIUM MESH MEMBRANE CELL ANODE

ATMA™ LOUVER TYPE MEMBRANE CELL ANODE

ATMA™ LOUVER TYPE MEMBRANE CELL ANODE[®]

We Undertake
Repair &
Refurbishment

Engineering Excellence In Electrochemistry

Titanium Tantalum Products Limited

Estd. In 1981

ISO 9001 - 2008 Certified

U, U2 & R Stamp Approved

CHLORALKALIANODES

ATMA™ MESH ANODES FOR MERCURY CELL

86/1, Vengaiwasal Main Road,
Gowrivakkam, Chennai 600 073, India.
Ph : +91 44 22780211 / 0212 / 1210
Fax : +91 22 22780209 / 1120

Salient Features

- ▶ TiTaN is unique in offering any geometry of anode for every application.
- ▶ TiTaN proprietary Electrode coating offers longer life of Electrolytic coating
- ▶ TiTaN offers unparalleled service in retrofitting new electrode for any existing process
- ▶ TiTaN designs, manufactures and supplies replacement for existing Graphite electrodes
